A Coral Reef Food Web

The table below lists some of the feeding relationships in a coral-reef habitat. In the space below the table, draw the food web described in the table. (You may write the names of the organisms instead of drawing pictures of them.)

CORAL-REEF HABITAT

Coral-Reef Organisms	Eat . . .	Are eaten by . . .
Algae	make their own food	animal plankton, sea urchins
Animal plankton	algae	shrimp, small fish
Sea urchins	algae	
Small fish	animal plankton, shrimp	octopus, squid
Shrimp	animal plankton	small fish, octopus, squid
Octopus	small fish, crabs, shrimp	
Squid	crabs, shrimp, small fish	
Crabs	remains of dead organisms	octopus, squid
Clams	remains of dead organisms	sea stars
Sea stars	clams
