# Wind

## Understanding Main Ideas

*Complete the flowchart below by filling in the blanks.*

1. \_\_\_\_\_ removes sand and other sediment from the ground by the process of 2. \_\_\_\_\_. → The wind
3. \_\_\_\_\_ the sediment when it hits an obstacle, such as a boulder. → As the sediment piles up, a(n) 4. \_\_\_\_\_ forms.

*Answer the following questions in the spaces provided.*

5. Describe how wind moves different sizes of sediment.

---

---

---

---

6. How does desert pavement form?

---

---

---

---

7. How are the sediments in loess deposits different from the sediments in a sand dune?

---

---

---

---

## Building Vocabulary

*Fill in the blank to complete each statement.*

8. The process by which wind removes surface materials is \_\_\_\_\_.
9. Fine sediment deposited by wind in layers is called \_\_\_\_\_.
10. A deposit of windblown sand is called a(n) \_\_\_\_\_.
